AMERICA'S BEST PANSY PLANTS

To successfully meet present day competition you must offer your customers the best. Small flowered Pansies can hardly be given away, but the giant blooming varieties literally "sell themselves." With this in mind we are offering the trade seven superb types that stand supreme as to size, range of color, and quality of bloom. Fill your Pansy needs from this list and insure a profitable Pansy season. Your customers will not be able to resist the appeal of these Giant Pansies.

GROUP ONE

HARROLD'S PEDIGREED GIANTS.

This is the finest variety produced by Mr. C. W. Harrold. It is of low, bushy upright habit; the flowers being borne on long stems well above the foliage. No other Pansy excels these as the flowers are of super-giant size ranging from 2½ to 4¾ inches, and there is a wide range of coloring, over 400 distinct combinations and hues being found in this mixture. It is exceptionally free flowering, and is among the earliest to bloom. This variety will give absolute maximum results under any conditions.

STEELE'S JUMBO MIXED.

This Pansy is of giant size with a fine wide range of bright colors. It is E. J. Steele's finest variety, and ranks with the finest Pansies on the American market. This is a variety you cannot afford to be without.

These two strains priced as follows: Strong seedling plants, 75c per 100; \$5.00 per 1000; 3000, \$14.00; 5000, \$22.00.

Transplanted plants: \$1.50 per 100; \$10.00 per 1000; 3000, \$27.00.

We can ship Pansies successfully to any part of the country, Harris Gardens being located near the geographical center of the United States.

GROUP TWO

HARROLD'S ALL-AMERICAN BEDDING MIXTURE.

This is a mixture of all the best types being grown by American specialists. It is about 80% Harrold's varieties, the other 20% being composed of varieties introduced by other American specialists. It undoubtedly contains the widest range of color and types to be found in a single mixture.

HARROLD'S IMPROVED SWISS.

Mr. Harrold has improved this type of Pansy, developing the desirable features and eliminating several that did not seem desirable in the original strain. The color range is strong in the dark shades, especially red and blue with flowers both 3 and 5 blotched marked. The flowers are of large size and well formed.

The two varieties in this group: Strong seedling plants, 60c per 100; \$4.00 per 1000.

Transplanted plants: \$1.25 per 100; \$8.50 per 1000; 3000, \$24.00.

GROUP THREE

STEELE'S GREENHOUSE SPECIAL.

This is a standard market strain producing large blooms in a great variety of colors. It is so well known throughout the trade that a detailed description is unnecessary.

GREATER AMERICAN PERFECTION.

Since its introduction several years ago by C. W. Harrold the florist industry has used several million plants of this variety annually. It is well adapted to supply competitive markets wherein price is a prime consideration. The flowers, mostly of the zoned and face types, are of giant size in a wide range of color.

All plants are grown in cold frames, sash covered during cold weather, and can be shipped at any time throughout the winter and spring.

OREGON MIRACLE MIXED.

This is another Harrold strain. A truly fine mixture being so well known it needs little description. The flowers are large with many fine color combinations. It has been a standard variety for a long time and you will like it.

The three varieties in this group: Strong seedling plants, 50c per 100; \$3.50 per 1000; 3000, \$9.75; 5000, \$15.00.

Transplanted plants: \$1.00 per 100; \$7.00 per 1000; 3000, \$20.00.

After December 1st, we will have "Ready to Sell" Pansies in full bloom. Prices on this size plant furnished on request. Special prices made on orders of 25 to 50 thousand seedling or transplanted plants.

CONDITIONS OF SALE

Prices are based on cash with order. Remittance should be by check, draft, or P. O. money order. All orders are packed light and shipped promptly on date wanted. Plants are quoted F. O. B. Muskogee, Okla., and will be shipped by express unless ordered shipped by parcel post, as express is the safest cheap method. We guarantee plants will reach you in good condition.

Five hundred plants will be supplied at the thousand price; 250 of a variety may be ordered at 1000 rate if total order equals 500 or more.

CULTURE

To obtain best results, Pansies should be planted in well drained soil enriched with barnyard fertilizer as they are heavy feeders. Moderate amount of moisture is necessary for large blossoms.
